Pomona College  
Claremont, Calif.

Dear Sir:-

Mr. Ivan M. Johnston of Berkley, Calif. informs me that you desire to make botanical exchanges. I would be glad to make such an arrangement with you especially if I could secure a number of Cyperaceae in which I am especially interested. For several years I have been putting out practically duplicate sets that go by exchange to many of the large herbaria of the country. As I collect in quantity for this purpose the number of different species collected each year is limited and "common weeds" are almost eliminated. My 1919 ~~sets~~ sets, which I hope to have ready within a week or two will each contain something over 200 numbers and I could also add a few from previous years. Should such an exchange be agreeable to you, we should, I suppose, have the mutual agreement to send only first class specimens and I would appreciate your sending as many cyperaceae as possible.

Very truly yours,

*Ira W. Clokey*
